

# Project Evaluation and Management Systems

1<sup>st</sup> Assignment: Review and Comparative assessment of Project Management Methodologies

---

**Issued:** 23/10/2025

**Submission:** 16/11/2025

## Objective

For this assignment you are asked to conduct a literature review and comparative assessment of the following Project Management Methodologies a) PMBOK and b) PRINCE2.

More specifically, you should:

- i. Describe the basic principles that underpin each one of the above methodologies
- ii. Execute a structured comparative assessment of these methodologies, specifically discussing their corresponding pros (strengths) and cons (weaknesses) and making a statement regarding the type of projects for which each of the methods, in your opinion, appears to be best suited for.

## Structure & Content

Your report should be complete and self-contained. It should include the following sections: abstract, introduction, description of methodologies and the comparative assessment section (as the body), conclusion and references (IEEE or APA style). The report should prove that you have understood the basic principles and underlying assumptions of each methodology, and it should include all the bibliographic sources you have used in your review. You may add tables, figures/diagrams. Keep the report consistent and well-structured.

It should not exceed 10 pages in size. The font size should be Times New Roman 12pt or Arial 11pt, with line spacing equal to 1.5 lines. All page margins (top, bottom, left and right) should be set to 2.5 cm.

## Indicative Bibliography

Uploaded on eClass platform

## Deliverable

You should submit the pdf file of your comparative assessment through the eClass platform.
